

## **Student Timeline for Class**

**NOTE: All participating dancers are required to bring in a signed, daily health screening form each and every day that you attend an in-studio dance class. That form is printable on our website and available at the front door.**

### **Before Class:**

- Please do not enter the facility any more than 5 minutes before the beginning of your class.
- Please wear your mask while on site.
- When you walk in the front door, the front desk staff member / “safety officer” will greet you with hand sanitizer and **take your temperature with a touchless thermometer**. A high temperature will result in the safety officer sending you home.
- The safety officer will then direct you to the bathroom(s) - **wash your hands thoroughly for 20 seconds or longer**.
- While changing into your dance shoes / waiting for class to begin, make yourself comfy in one of the designated chairs that are established at safely appropriate distances in the hallway. Thanks.
- Your teacher will welcome you into the studio one at a time at the start of your class and direct you to a mark on the floor. Please do not remove your mask. If you need a “breathing break” during class, you can go into studio B for a moment to remove your mask and take some breaths. **Face shields will also be available if wearing a mask is medically challenging.**

### **During Class:**

- **Enjoy class!!!** Teachers will continually encourage social distancing & safety awareness throughout the session.

### **After Class:**

- Your teacher will end class on time and send you to the bathroom to once again **wash your hands** one at a time. Grab your water bottle and exit the studio!
- We encourage everyone to **BLOW YOUR NOSE** after leaving the studio - this is an additional precaution that is recommended to all :)
- Taking more than one class? **Wash your hands**, wear your mask please and thanks, and consider stepping outside and get a breath of fresh air !!!
